Welcome to the 4th NARALO General Assembly co-located with ARIN 39 in wonderful New Orleans.

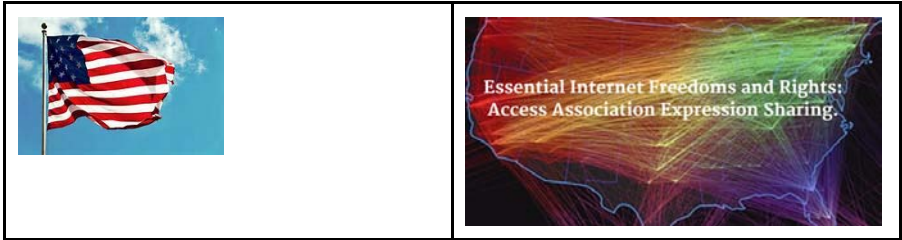

We would like to acknowledge the support of our primary sponsor ICANN for providing travel; hotel and staff support to organize this event. Special thanks to Heidi, Silvia, Susie and Constituency Travel in helping with the logistics and planning of the event. Secondly, we would like to thank or acknowledge ARIN's Susan Hamlin and super volunteer Chris Tacit in allowing us to co-locate and support our participants in participating with the ARIN 39 event. Lastly, we would like to thank ISOC and Mark Buell for sponsoring Sunday's social event.

In the document that follows you will see the following:

- A listing of all ALS, Unaffiliated and NOMCOM ALAC member descriptions and contact information
- Links to important documents on the ICANN Wiki site about NARALO and AT-LARGE
- Post event survey <https://goo.gl/forms/4j14gu6KN8f4mEji2>

Capital Area Globetrotters

This community is for people interested in becoming active as an at large structure of ICANN in DC. We plan to engage in a wide spectrum of Internet issues, including policy, governance, technology, and development. Our Goal is to ensure that a healthy, sustainable Internet is available to everyone – today and for the next billion users. To find out more information about NARALO, At-Large or ICANN visit our webpage at www.naralo.org or the At-Large page at atlarge.icann.org.

Our Mission is to ensure that a healthy, sustainable Internet is available to everyone – today and for the next billion users.

We seek to promote the following:

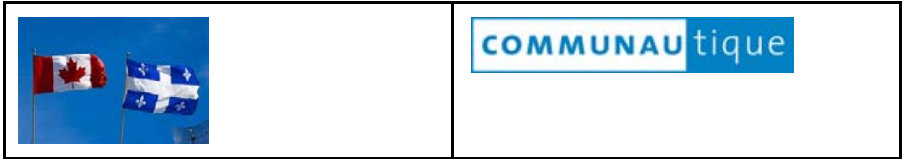

- Professional development and builds community to foster participation and leadership in areas important to the evolution of the Internet.
- Provide reliable information about the Internet.
- Provide forums for discussion of issues that affect Internet evolution, development and use in technical, commercial, societal, and other contexts.
- Foster an environment for international cooperation, community, and a culture that enables self-governance to work.

- Serve as a focal point for cooperative efforts to promote the Internet as a positive tool to benefit all people throughout the world.
- Organize events and opportunities that bring people together to share insights and opinions on issues relating to Internet Governance, Domain names, Access, Innovation, and Transparency.

Consumers Council of Canada

The Consumers Council of Canada, a non-profit, voluntary organization, is working towards an improved marketplace for consumers in Canada. It seeks an efficient, equitable, effective and safe marketplace in which consumers are able to exercise their rights and responsibilities. The Council has been a member of the [Canadian Consumer Initiative](#).

The Council advocates for the [charter of International Consumer Rights](#), to which it has added a ninth, the Right to Privacy, and they include:

- The right to safety.
- The right to choose.
- The right to be heard.
- The right to be informed.
- The right to consumer education.
- The right to consumer redress.
- The right to a healthy environment.
- The right to basic needs.
- The right to privacy.

The Consumers Council of Canada is committed to:

- A Voice for Consumers: We endeavor to be a voice for consumers across Canada.
- Listening to Consumers: We work to listen to consumers and develop policy consistent with what we are told.
- Consumer Empowerment: We provide leadership in educating and informing consumers about their rights and responsibilities.
- Integrity: We endeavour to conduct our business in ways that are consistent with the highest professional and ethical

standards.

- Stakeholder Involvement: We actively seek the advice of a broad range of stakeholders, including other consumer groups, and assess the specific suggestions made, to incorporate, where appropriate, their advice into the Council's policies and programs.

Hispanic Educational Technology Services

The Hispanic Educational Technology Services (HETS) was established in 1993, as the first bilingual consortium constituted by more than 40 higher education institutions in Puerto Rico, United States and Latin America. The organization's mission is to support, promote, and increase the capabilities of member institutions in order to enhance Hispanic/Latino student success and opportunities in Higher Education by:

- Providing training and support for faculty, staff and students of member institutions;
- Facilitating, promoting, and nurturing strategic alliances among HETS members and the academic, government, and corporate sectors;
- Supporting the integration of new education-oriented technologies; and identifying and gathering expert support and resources for member institutions.

HETS is constantly looking for newer and fresher ideas in its field of expertise to bring its members the best of all services, and maximize the knowledge and experiences of member themselves, as they get together to collaborate with each other and contribute to one another. This is why one of the HETS Consortium priorities involves the development and offering of educational events for students, faculty and administrators; publications, including a peer review journal: HETS Online Journal; trainings; and the access to online tools and resources through the Student Placita and the Faculty Placita at the

hets.org

portal, among other services. We invite you to join us, collaborate with us, and take advantage of these services.

ISOC Colorado

Our Mission

CO ISOC seeks to harness the great resources of this region in order to perpetuate the open evolution of the Internet for the advancement of human knowledge and communication, here in Colorado and around the world.

CO ISOC members pool our resources to contribute in the following ways:

Pool of Experts – Being a group rich in experience and expertise surrounding the Internet, we will be THE local resource for Internet information. When the media, policy makers, schools and all other local organizations need statements, advice or speakers; we will be there to fill that need.

Educating Ourselves – When groups like ours meet, we learn from each other. More formally, as a chapter of the Internet Society, we have resources at our disposal that would likely not be available to us otherwise. From getting together and discussing our current challenges and opportunities to disseminating global Internet related news to scheduling speakers on topics you care about, this chapter will be an invaluable resource to it's members.

Representative Mike Schoenecker

Email mike.schoenecker@gmail.com,

ISOC Greater Washington DC

The Greater Washington D.C. Chapter of the Internet Society (ISOC-DC) is a membership organization that seeks to further the mission of the Internet Society (ISOC) in the District-Maryland-Northern Virginia metropolitan area by serving as a hub for education and discussion concerning the important issues confronting the future of the Internet.

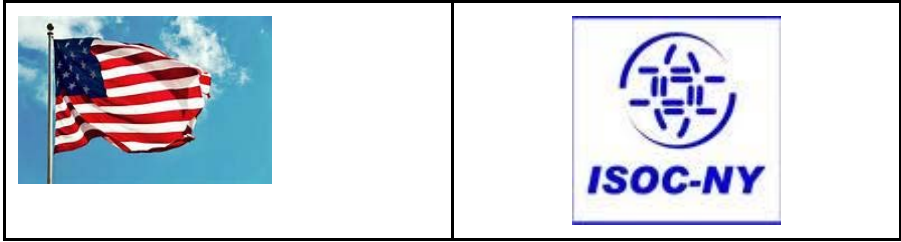

Over the past several years the Washington DC Chapter of the Internet Society (ISOC-DC) has gained a global reputation for excellence in programming. For the past three years ISOC-DC has proudly served as the Secretariat and organizational home of the [IGF-USA](#) (Internet Governance Forum for the United States). The annual conferences during these years are widely recognized as the most successful in the IGF-USA's history.

The Internet Policy Forum (IPF) is an initiative undertaken by ISOC-DC that seeks to leverage our chapter's many successes and further develop the infrastructure needed to build a sustainable and scalable forum that can serve as a hub for discourse concerning the key issues confronting the Internet.

San Francisco Bay Area ISOC Chapter

NARALO Representative: Leah Symekher
Consultant & Advisor to the SFBay Area ISOC Chapter Board
Email: Lsymek@gmail.com
Location: San Francisco-Bay Area, California

The San Francisco Bay Area ISOC Chapter was founded in 2009 and is located in the heart of Silicon Valley. Our geographic location makes us uniquely positioned to leverage the culture of technology innovation in this region, enabling us to structure the Chapter as a valuable platform to discuss and advocate pertinent issues that affect the most important vehicle driving most of these innovations: the Internet.

While we are regionally focused and cover the state of California, we maintain a global perspective and have a representation of around 2,000 members.

Our goals are to:

- Provide a platform for members to engage in Internet issues

that include: Policy, Governance, Technology and Development.

- Provide the opportunity for outreach from the Chapter to the local community and organizations on these topics.
- Promote the core values of the Internet Society, <http://www.internetsociety.org/who-we-are/mission/values-and-principles>.
- Interact with international ISOC Chapters and relevant groups outside of ISOC.
- Contribute to programs related to standards, public policy, and education for the membership.

Our efforts to continually achieve the above goals is evident through our:

- **Events:** <http://www.sfbayisoc.org/chapter-events/>
- **Projects:** <http://www.sfbayisoc.org/projects-overview/current-and-future-projects/rural-broadband-project/>
- **Working Groups:** <http://www.sfbayisoc.org/working-groups/>

ISOC Puerto Rico

Eduardo Díaz, President

NARALO representative in the 2016-17 ICANN NomCom

Email: eduardodiazrivera@gmail.com

Location: San Juan, Puerto Rico

Eduardo Díaz signing the NARALO MOU with ICANN in 2007.

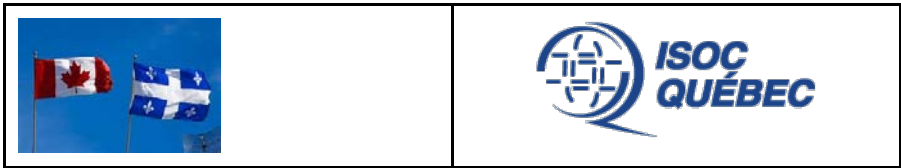

ISOC Puerto Rico was founded in November 2001, by 40 individuals, but now has over 800. Our mission is to foster the use, evolution and open development of the Internet for the benefit of all people in Puerto Rico and throughout the World as well as provide an organism capable of producing reliable, relevant and current information about the Internet on a local, regional and global level.

ISOCPR seeks to maintain and extend the development and availability of the Internet, its applications and related technologies to allow organizations, professionals and individuals throughout the world to cooperate, innovate and collaborate more effectively in their respective

fields and interests.

Website: <http://isocpr.org>

Facebook: <https://www.facebook.com/isocpr/> Twitter: @isocpr

ISOC Québec

Isoc Québec, comme son organisme parent, l'**Internet Society**  (ISOC), vise à promouvoir le développement, l'évolution et l'utilisation libres de l'Internet pour tous les citoyens du monde.

Isoc Québec travaille activement à encourager le déploiement et l'utilisation de l'Internet partout au Québec et sur la scène internationale.

Par utilisation de l'Internet, on entend ici non seulement l'accès aux services couramment offerts dans l'Internet, mais également leur appropriation par l'ensemble de la population québécoise.

S'agissant de l'accès à l'Internet, ISOC-Québec entend soutenir le principe de l'universalité, principe qui recouvre en fait cinq questions distinctes :

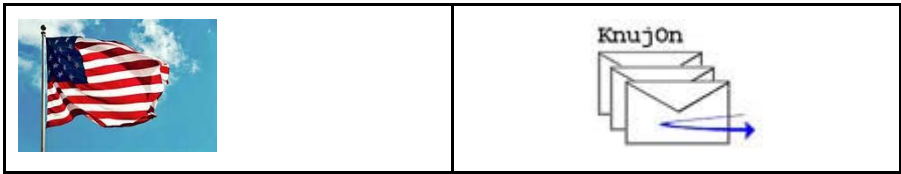

- la question d'une distribution géographique adéquate des points d'accès ;
- la question d'une structure tarifaire conçue de façon à ne pas engendrer de grandes exclusions ou de fortes disparités dans la population ;
- la question du déploiement de modes d'accès dans les endroits publics, de manière à assurer la participation des citoyens non informatisés ;

- la question d'une politique de transfert de savoir-faire de façon à permettre à la population québécoise de maîtriser ce nouvel outil ;
- l'importante question de l'accès à la publication dont dépend la présence québécoise dans l'Internet : transformer les Québécois en producteurs d'information sous-entend l'ouverture de la gamme des dispositions techniques offertes à coût raisonnable à l'ensemble de la population québécoise, pour inclure, à titre d'exemples, des requêtes telles une bande passante large et symétrique, une adresse IP fixe, etc.

S'agissant de l'appropriation de l'Internet, ISOC-Québec entend rappeler que celle-ci :

- renvoie et repose sur la qualité première de l'Internet qui est de favoriser, voire de relancer le principe fondamental d'une communication paritaire et égalitaire entre toutes les personnes connectées ;
- exige une réelle familiarité avec les outils et un savoir-faire permettant une utilisation efficace des ressources du réseau des réseaux ;
- doit réussir à stimuler l'initiative et la créativité qui fondent les efforts de publication, c'est-à-dire permettre à la population québécoise de trouver les moyens de communiquer et de s'exprimer dans le nouvel univers médiatique.

Native Public Media

Our Mission

To promote healthy, independent, and engaged Native Communities through media access, control and ownership.

NPM understands that progressive policies and regulations that encourage the expansion and strengthening of Native public media through mediums and platforms that are truly community-based, local, and democratic are critical to Indian Country. With a proactive program of policy analysis, representation and education, NPM works to secure a voice for Native America among policy-making bodies and among the media democracy movement, promoting greater access and larger audiences for Native American voices. NPM's Policy Program currently consists of four projects: Communications Scholarship, FCC Filings, the [National Congress Of American Indians \(NCAI\)](#) Communications & Telecommunications Resolutions and the Tribal Telecom Conference. Native Public Media is only able to do what we do through partnerships with the Native radio system, media makers, tribal leaders, industry, government, allies, and the corporate and non-profit sectors. We are proud to be a connector within Indian Country and to our friends of Indian Country. Contact us to be a part of the movement of Healthier, Independent, and Engaged Indian Communities!
